Space Grant Internship Application details

STUDENT – Students will be asked to answer the following:

- Please describe the nature and scope of proposed project (in your own words).
- Describe your academic background and experience
- Briefly describe your education goals and career interests
- Describe how the Space Grant Undergraduate Research Internship Program can fit your particular needs and interests, and what you expect to gain from it

MENTOR – Mentors will be asked to answer the following:

- Please give a one paragraph description of the proposed student project.
- Please list your degrees and/or professional certifications:
- Please indicate a dollar amount match of your salary, equivalent to a minimum of 5% of your time. This is considered an in-kind match. (Please be specific as this information is needed to meet NASA requirements).
- Describe the actual work to be performed by the student.
  Estimate the number of hours per week, over two semesters, needed to complete the work.
- Give a brief summary of the expected outcome of the work (presentations, publications etc.) in which the student will be involved.
- If applicable: give the name, title, and brief description of the person who would directly supervise the student on a day-to-day basis (if different from yourself):
- Is this project connected with funding from other sources? Y/N
  Is it possible that this project will have support from other sources? Y/N

Have you received previous Space Grant support? Y/N
  If yes, please give the name of project, project year, student names and summary of the outcome or results, including presentations or publications involving Space Grant students.

Please state how your proposed project would benefit NASA, or otherwise overlap with NASA’s wide-ranging interests.
